

October 4 - 10

About the Program:

The World Space Week is a united nations declared celebration held each year from October 4 to 10. These dates commemorate two events: 1. October 4, 1957: Launch of the first human-made Earth satellite, Sputnik 1, thus opening the way for space exploration. 2. October 10, 1967: The signing of the Treaty on Principles Governing the Activities of States in the Exploration and Peaceful Uses of Outer Space, including the Moon and Other Celestial Bodies.).

World Space Week consists of space education and outreach events held around the world by space agencies, aerospace companies, schools, and other organizations. Every year, a different theme is chosen to highlight an aspect of space that has broad appeal to humanity and to inspire the next generation. In this regard, we are celebrating SRM - world space week 2022 (Theme - "Space and Sustainability") with the following events, along with thousands of participants in over 90 countries.

Participation Link will be shared to the registered members. Certificates and trophies will be given to the winners. and Participation Certificates will be given to all the participants
