

# WOMAN IN SPACE

A woman in a space suit stands on the surface of a planet, looking out at a starry space with a large planet in the background. The scene is illuminated by a bright light source, possibly the sun, creating a lens flare effect. The woman is wearing a full space suit with a helmet and a backpack. The background is a deep blue space filled with stars and a large, curved horizon line of a planet.

Word space week 2023

فالنتينا تيريشكوفا

**Valentina  
Tereshkova** The  
**first Russian  
astronaut traveled
