Activity pioneer Kholoud Abu Talib

School leader Aisha Hamdy

AN INTRODUCTION

World Space Week is a celebration announced by the United Nations in space annually, every 4 to 10 October, and is the largest space event on Earth, with more than 8,000 events reported in 2019 and held in 96 countries. These events are organized by thousands of organizations, including space agencies, airlines, astronomy clubs, and museums. In 2020, the World Space Week of Satellites and their broad benefits is devoted to the theme "Satellites Improve Life".

Despite the global pandemic, there are safe and exciting ways to participate and celebrate World Space Week. The Highlights section showcases some of the creative, innovative and popular events that bring people together to celebrate the space

Celebrate World Space Week with the theme "Satellites improve lives by finding and monitoring satellites from home"
