World Space
Week OCTOBER 4-10

Introduction

An international celebration program of science and technology to improve people's quality of life. This week contains educational and awareness-raising activities about space and its sciences, organized by space agencies, airline companies, schools, planetariums, museums and astronomy clubs around the world within a common time frame.

Vision

Urging students to aspire to study space science and research its developments.

Mission

Interests in space, science, technology, engineering, mathematics, and education.

General aim

1. Educating students about the benefits they get from space.
2. Providing students with rich skills and information in space science.
3. Providing students with rich skills and information in space science.
4. Encouraging students to increase their innovations and experiences in the fields of space for sustainable economic development.
5. Showing public support for space programs and the scientific advancement in our country.
6. Arousing students' interest in science, technology, engineering, and mathematics.
7. Strengthening international cooperation in awareness and education in the field of space

Implementation methods

- Registering the school on the World Space Week website“
- choosing activities and events such as: (drawing activity, lectures, exhibitions of student work)
- publishing the events on social media sites
- activating the electronic wall.
